NEW

I Drum dispensing pallet rack with sump

- Manufactured from steel plate, which is corrugated for additional strength. • Fully seam welded sump that is fully compliant with all the current UK regulations.
- Pallet is fitted with fork hoops to aid movement and keep the underside of the sump off the floor.
- The drums sit on cradles above the sump and are further protected by raised back and side walls.
- Prior to painting the unit is fully shot blasted to provide a clean and keyed surface.
- An appropriate size/capacity fork lift truck will need required to offload this item from the delivery vehicle.

Code	Drum capacity	Sump capacity litres	Ext H x W x L mm	Price £ each

Sliding carriage

- For use with drum spill pallets 428487DX8 & 428488DX8
- This sliding carriage allows the lower level of drums to slide forward to aid with loading and unloading.
- On the 4 drum unit the carriage slides from underneath the top drums.
- Under no circumstances must the sliding carriage be used when the unit has been stacked on top of another unit.
