Emergency stop

B High rise telescopic gravity fed conveyor

- An efficient, gravity fed method of unloading shipping container and trailer loads, without the use of a raised loading dock.
- Saves time and labour.
- Only 4.5m length folded for easy storage.
- High impact, low inertia Ø50mm PVC rollers in fully welded mild steel frames.
- Ø50mm zinc plated steel rollers at the load point (Ø20mm at deck transfer sections).
- Height easily adjusted using screw jacks.
- End stop plate
- On Ø200mm PU castors.
- Roller pitch: 65mm on high rise, 75mm discharge section.
- Width 600mm.
- Conveyor length: 13.5m fully extended (10m in vehicle).
- Optional mobile extensions to increase the overall length.
