

A Single person access tower

- Designed specifically for individual use.
- Easily erected in under 10 minutes by 1 person.
- Height adjustable 1 meter increments.
- Easy clip frame clips and easy lock frame stabilisers create a stable working foundation.
- Base doubles as a storage and transport trolley for the components.
- Ergonomic stabilisers can reduce the floor space used by up to 65% compared to traditional access towers.
- Unique component hanging system provides a convenient place to store materials during assembly and dismantle and slides back into place when not in use.
- Capacity: 150kg UDL.
- Overall: W728 x L1170mm.
- Platform: W610 x L1021mm.
- Stabiliser footprint: W2400 x L2800mm.
- **EN 1004 class 3** compliant for internal and external use.
