

### E Lithium battery storage safe - 12-53L capacity

ALL  
NEW

- Designed for the safe storage and charging solution for of lithium-ion batteries.
- Tested to NT Fire 017-60 Paper and certified 60 minutes of document fire protection.
- The two larger safes are also tested to MTC DIP120-60DM fire test standards and offers 60 minutes of fire protection for digital media, DVDs, USB's, memory sticks and hard drives.
- Two larger safes also come with one height adjustable shelf.
- Fire and impact tested from 9.1m for falling impact resistance.
- Fitted with high quality key lock, 2 keys provided or with advanced electronic lock or with high security touchscreen keypad and fingerprint lock with clear LED display, internal alarm, dual control, hidden code and scrambled code that can be programmed as standard with up to 32 fingerprints.
- Standard rechargeable batteries are also suitable (AAA, AA, Type C, Type D, and 9V).

### G Lithium battery storage safe - 220-626L capacity

- Designed for the protection from effects of lithium battery fires.
- Tested to EN14470-1 (part 1) for 90 minutes.
- Fire and impact tested from 9.1m for falling impact resistance.
- Fitted with standard air ventilation ducts and heat protected by a thermal fuse that triggers at 75°C to seal the unit of internal fire.
- Doors have auto-closing and autolocking feature to ensure safe fires are sealed.
- Fitted with key lock, 2 keys are provided or with high security electronic lock or with high security touchscreen keypad and fingerprint lock with clear LED display, internal alarm, dual control.
- Internal base and perforated height adjustable shelves are provided.
- Each shelf has a load capacity of 100kg.
- More detail online.
