

Safety & Security Barriers

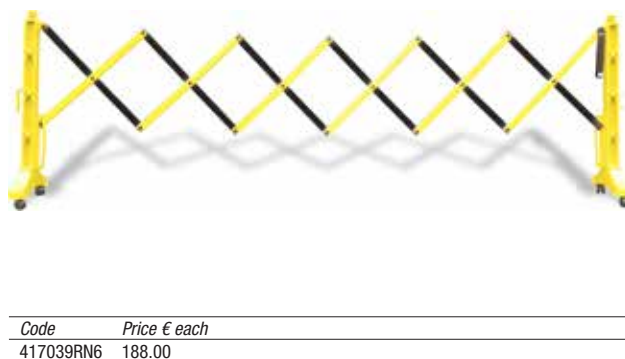

A 2.5m plastic water fillable expanding barrier

- Expands from 230mm to 2.5m.
- 380mm wide legs can be filled with water for greater weighted stability.
- Can be attached to other barriers via 50mm holes on legs (fixings not included).
- 35mm diameter hoop on top of each leg for cord or tape
- Sturdy yet flexible material allows for quick and easy stowing.
- H x W x D: 980 x 230-2500 x 380mm.
- Weight without water: 2.36kg.

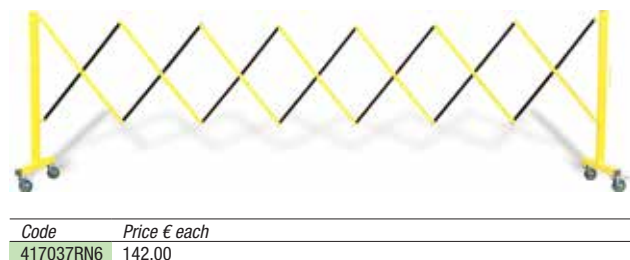

B 3.4m mobile plastic expanding barrier

- Made from polyethylene.
- Collapses down into its own frame and can be carried like a tool box.
- Multiple barriers can be linked together.
- Height 965mm.
- Extends to 3.4m.
- Weight: 6.5kg.

C 3.6m mobile expanding barrier

- Made of steel.
- Expands up to 3.6m.
- Height 1020mm.
- Weight 8.5kg.
- Locking mechanism to lock the barrier in place when not extended.
- Supplied with locking swivel castors.
- Can be joined to other units to make a barrier of any length.

D 4.9m mobile expanding barrier

- Made of steel.
- Expands upto 4.9m.
- Height 940mm.
- Weight 10kg.
- Can be joined to other units to make a barrier of any length.
