Face Masks & Respirators

A 3M™ FFP1 valved cup-shaped mask

- Provides reliable, effective protection against fine dust particles. • Comfortable and lightweight off-the-face design, it provides a good fit over a wide range of face sizes.
- The valve reduces heat build-up even in hot and humid conditions.
- Durable, collapse-resistant inner shell provides strength and stability.
- Meets the requirements EN149:2001 + A1:2009.
- Made in the UK.
- Sold as pack of 10.

B 3M™ FFP1 disposable valved comfort mask

- Suitable for low levels of dust that is not harmful to health.
- Valve allows air to flow out when you exhale, which makes breathing easier and reduces the build-up of heat & moisture inside the mask.
- Flat-fold 3-panel design allows for greater facial movement.
- Low-profile style of the embossed upper panel creates a seal that reduces eyewear fogging and improve eyewear compatibility.
- Made in the UK.
- Sold as pack of 10.
