

E Metal safety rail system

- Modular system of cast iron clamps and galvanised steel tubing.
- Comply with the UK's Health and Safety Regulations, CDM Regulations and Building Regulations.
- Clamps are free from sharp edges with a galvanised finish and are available in four sizes.
- Tubing is manufactured to BS 1387, supplied in 3.2 metre lengths and available in 4 different diameter sizes. • Simple and quick to design and install. • Safe construction with high load capacity, can be taken apart at any time. • Self assembly required.

Tubing

- Galvanised steel. • Length - 3.2m.

Code	Overall Dia. of Tube mm	Thickness (gauge)	Clamp Type	Price € per 3.2m length

N.B. Other types of clamps are available on request - please enquire.

Information

First decide on the diameter of tube you require, selecting A, B, C or D. You can then begin selecting the correct clamp fittings. Tubing supplied is plain galvanised steel, colour coated steel tubing is available on request.

Can be used for many applications

Standard wall/floor plate

Base plate

Face fixed base plate, vertical fixing

Face fixed base plate, horizontal fixing

Upright pivot (0° to 11°)

Side fixed wall bracket

Plastic end plug

Middle rail pivot (0° to 11°)

Top rail pivot (0° to 11°)

End joining pivot (0° to 11°)

Pivot centre vertical tube (0° to 11°)

Simple tee

External straight connector

90° Elbow

90° 3-Way elbow

Corner with through centre tube

Long tee, 3 sockets

2-Way cross with centre vertical tube

Adjustable angle cross (30° to 45°)

3-Way cross with centre vertical tube

4-Way cross with centre vertical tube

90° Cross over
