

# Premises Window Film / PVC Strip Door Curtains

## A Solar control window film

- Reduces solar heat, UV and screen glare (deflecting 78% of the sun's heat and glare, reducing glare by 82% and rejects 99% of UV).
- Helps make a saving on air conditioning bills.
- Colour - silver.
- Reflective properties increase privacy, reducing visibility from outside.
- Hard-wearing scratch-resistant surface.
- Easy to apply to existing glass.

| Code      | Width mm | Price € each |
|-----------|----------|--------------|
| 420817RN6 | 915      | 19.84        |
| 420818RN6 | 1220     | 27.44        |
| 420819RN6 | 1524     | 36.59        |

## B Lightweight reinforced PVC strip curtains

- Help make energy savings and maintain a constant temperature.
- Easy to install - staple gun to a wooden frame (supplied with fitting instructions) to save on expensive metal fittings.
- Nylon reinforced PVC strips are lightweight, tough, clear and flame retardant to BS5438.
- Roll W x thickness: 305 x 0.5mm (approx. area coverage of 7.5m<sup>2</sup>), simply cut roll to required lengths.
- Roll length: 50m.
- 323496RN6 prevents condensation, air/moisture loss and ice build up.

## Information

It is recommended that PVC strips are hung with an approximate 50% overlap for internal applications and an approximate 100% overlap for external applications.

Our standard grade PVC is suitable to +50°C to -10°C.

Low temperature grade PVC is suitable for -10°C to -25°C.
