

E Medium duty impact protection barrier system

- Highly visible medium duty railing system ideal to separate and protect machinery and pedestrian walkways from vehicular traffic etc. internally or externally, and is suitable for installations where Heavy Duty protection is not required. • Excellent build quality and strength.
- Made from High Grade Steel. • Modular design for quick & easy installation. • Counter sunk bolts secure rails to posts.
- Modular design for a quick installation and effortless additions in the future. • Can be easily extended at any stage. • Damaged sections easily replaced. • TUV-tested according to DGUV 108-007

Corner, end and centre posts

- 90° corner, end and centre posts to use as part of the impact protection railing system. • Indoor use posts finish: powder coated.
- Outdoor use posts finish: hot dip galvanised and powder coated.
- H x W x D: 1000 x 70 x 70mm.

Manual closing gate

- Made from High Grade Steel. • Can be installed to hang either the left-hand or right-hand side, and the unique hinge feature allows it to be opened either inwards or outwards up to 90 degrees.
- Designed to fix to end posts, centre posts or corner posts
- H x W x D: 520 x 905 x 30mm. • Gate: H x W: 475mm x 835mm.

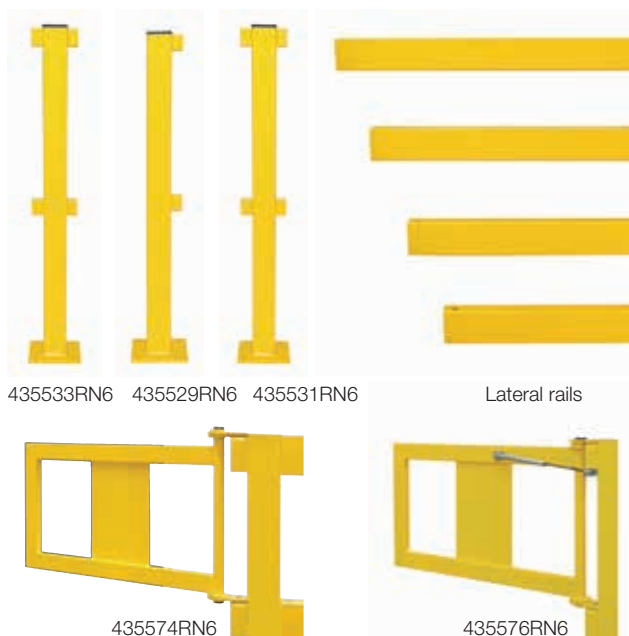

Lateral rails

- Barrier rails to use as part of the impact protection railing system.
- Indoor use posts finish: powder coated. • Outdoor use posts finish: hot dip galvanised and powder coated. • H x D: 60 x 40mm.

Medium duty railing system - self closing gate

- Made from High Grade Steel. • Can be installed to hang either the left-hand or right-hand side, and the unique hinge feature allows it to be opened either inwards or outwards up to 90 degrees.
- Gas-spring powered self-closing action.
- Requires separate installation post • H x W x D: 520 x 905 x 30mm.
- Gate: H x W: 475mm x 835mm.
